

Computer science

- User inputs (`input()`) in Python R 1.5 hrs
- Screen outputs (`print()`) in Python R 1.5 hrs
- Hardware input devices (keyboard, mouse)
- Hardware output devices (monitor, speakers)
- Logic gate inputs and outputs (A, B, and Q)
- Basic Python code (variables, inputs, print)
- Boolean logic (AND, OR, NOT)
- Logic gate diagrams and symbols 0 2 hrs
- Truth tables (1s and 0s)
- Selection statements (`if`, `elif`, `else`)
- Comparison operators (`==`, `!=`, `<`, `>`)
-

- Prime factorisation, HCF, and LCM G 1 hr
- Rounding, estimation, and significant figures G 30 min
- Upper and lower bounds (accuracy limits) 0 1 hr
- Laws of indices (powers and roots) 0 30 min
- Standard form calculations G 30 min

MATHS

- Fractions, decimals, and percentages equivalence 0 30 min
- Reverse percentages and compound interest R 1 hr 30
- Ratio sharing and direct/inverse proportion R 45 min
- Basic algebraic simplification and substitution R 1 hr
- Expanding double brackets and factorising single brackets G 45 min
- Rearranging formulae and changing the subject 0 1 hr
- Solving linear equations with fractional coefficients R 1 hr
- Linear graphs, gradients, and $y = mx + c$ 0 1 hr 30
- ~~Introduction to quadratic equations and graphs~~
- Arithmetic and geometric sequences 0 30 min
- Angles in parallel lines and polygons G 10 min
- Perimeter and area of complex shapes 0 1 hr
- Circumference, area of circles, and sectors 0 2 hr 30 min
- Volume and surface area of prisms and cylinders 0 1 hr
- Pythagoras' theorem and basic trigonometry G 1 hr
- Congruence and similarity in 2D shapes 0 1 hr
- Geometrical transformations (rotation, reflection, translation, enlargement) R 1 hr 30
- Venn diagrams, sample spaces, and theoretical probability 0 1 hr
- Averages (mean, median, mode) and range from frequency tables 0 1 hr
- Scatter graphs, correlation, and line of best fit 0 1 hr
- Two-way tables, stem and leaf diagrams R 45 min
